Sprint Review

The sprint review is your opportunity to maximise the value of the product, rather than slavishly sticking to the original plan and its out-of-date requirements.

The scrum team and stakeholders inspect the latest increment, changing market conditions, and the updated release forecasts.

After feedback and discussion, the product backlog is amended to create a plan to deliver the most relevant and valuable product possible.

Attendees

Developers

"This is what we built"

Scrum Master

Product Owner

"Forecast for release 2 is sprint 8"

Stakeholders

"Review this niche use for our product"

Outside Core Team (optional)

Actions

- Demonstrate working product
- Discuss market conditions
- Review the forecast (e.g. with a product burn up chart)
- Prioritisation decisions are discussed regularly and transparently

Check List

- ✓ Attended by the scrum team and stakeholders
- ✓ Time box: 4 hours
- ✓ Ensure that all developers participate
- ✓ Demonstrate sprint outputs, untested or incomplete work is NOT shown
- ✓ Provide and record feedback on the working product
- ✓ Avoid product owners signing off stories
